

Map meeting 2019 - preliminary programme

The Norwegian Orienteering Federation invites you to a Map meeting during WOC in Østfold.

Tuesday 13th August there will be a forest session at «Knatterudfjellet» after the middle distance qualification and the spectator race. The WOC 2019 mapper, Kristen Treekrem, will be present.

Thursday 15th August, after the spectator race at Kongsten, there will be an indoor session.

We encourage all map enthusiasts – Norwegian or non-Norwegian – to join.

Non-Norwegians who would like to participate need to register through the Norwegian Eventor (see link below).

The «Language of communication» will be depend on the audience. If there are non-Norwegian participants, English will be used.

We hope to start as soon as possible after the spectator races, as this will gives us more time for mapping discussions on the following topics:

- the revision of the ISOM (IOF map specification)
- the revision of the ISSOM (IOF sprint map specification)
- printing (laser/offset): Offset printing using CMYK + Brown. Should the Norwegian Competition Rules be adapted? What should be the requirements for map printing for chamionships?
- OCAD's new import wizard and smoothing of LAZ-data

The Mapping comittee of the Norwegian Orienteering Federation wishes you a warm welcome and look forward to good map discussions.
